INSULATED GLASSFIBRE **TRADE** SAFETY STEPS

- **A "must" for all who work near electricity.**
- Electrically insulated stepladders which represent tremendous value for money.
- Electrically insulated to 30,000 volts.
- GS and TÜV approved to EN131 safety standard with a maximum safe working load of 150kg (23.5stones).
- Features yellow channel-section side stiles with 3" deep non-slip alloy treads at American standard rise of 300m (12").
- Metal side arms and moulded top tool tray for tools and fixings (on Swingback models), plus durable non-slip rubber feet at the base.
- Double-Sided models are constructed as above but with a tread section both sides. This makes them more practical, allowing less moving to complete jobs. Also makes them even stronger because tread sections are more robust than the rear section of Swingback steps.
- Note: American rise of 300mm (12") per tread means these steps are taller than UK designs for any given number of treads.

"TRADE" GLASSFIBRE SAFETY STEPS - to EN131 (150kg)			
Code	Overall Height Open	No. Treads incl top	Appx Weight
GLASSFIBRE SWINGBACK STEPS			
YF74004	1.14m / 3' 9"	4	5.2kg
YF74006	1.71m / 5' 7"	6	7.8kg
