

GRAZ MODULAR SPACESAVER STAIRCASE

Graz is a sturdy staircase in epoxy coated steel with varnished Beech multi-layer treads.

Amazingly low price for a staircase which can be fitted as a **straight or curved flight!** Curves can be at top or bottom to suit your location.

Spacesaver "paddle" type treads make it really compact to fit into the smallest spaces.

Self-assembly kit contains 12 treads to fit floor-to-floor heights 2.40m - 2.92m.

Adjustable height of the 13 risers 18.5cm - 22.5cm ensures accurate alignment with your upper landing point.

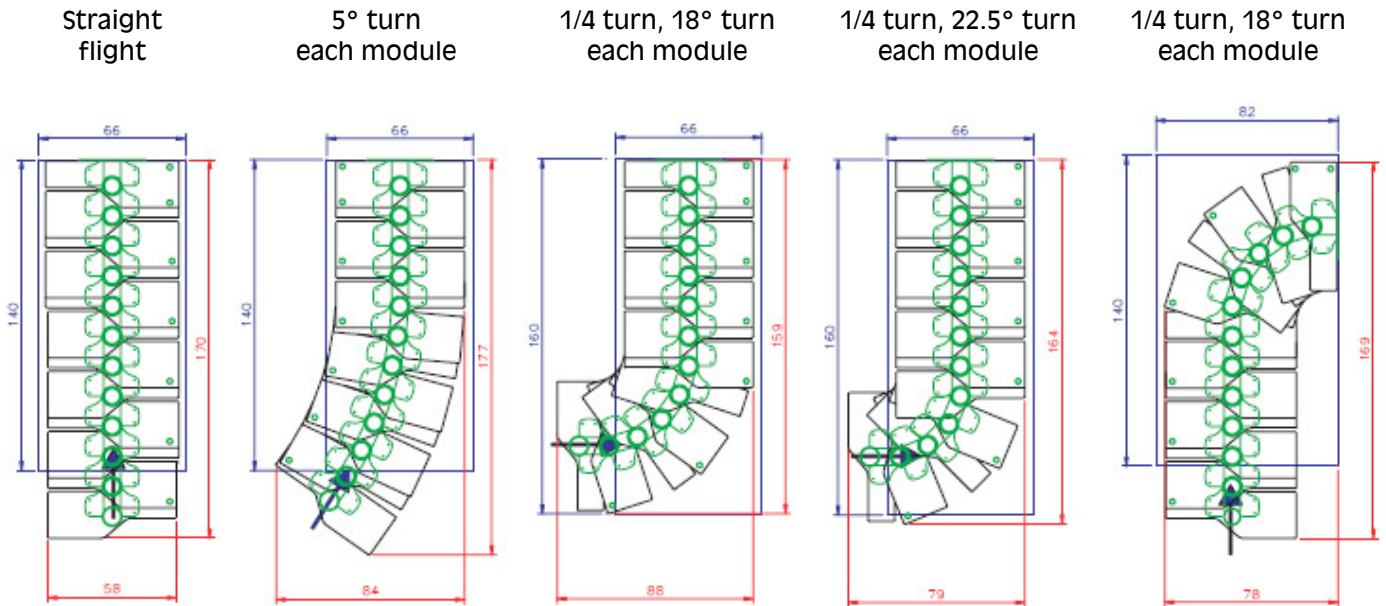

Treads 58cm wide of varnished beech multiplex.

Error - please note that lower three treads in photograph are fitted incorrectly. The wide part of the tread should alternate at each tread (as shown in diagrams overleaf and upper treads here).

GRAZ MODULAR SPACESAVER STAIRCASE

Examples of configurations for GRAZ modular staircase

Detailed installation instructions supplied with every staircase
