

HEAVY DUTY "TRUCK-DOCK" STEEL MOBILE SAFETY STAIRS

- ▶ A special version of the "Easy-Slope" range but with a larger platform and allowing access off all 3 sides. Ideal for accessing and loading lorries.
- ▶ Keeps the shallow 48 degree rake angle and low 230mm tread rise of the "Easy-Slope" models for maximum ease and safety.
- ▶ Large top platform 700mm wide x 1200mm long.
- ▶ Large punched steel treads 700mm wide x 200mm deep.
- ▶ Braked by the bright yellow integral Ascent Safety Bar. This blocks access to stairs whilst mobile. When pushed back, the castors are automatically raised from the ground to stabilise the stair and allow access to the platform.
- ▶ Rubber tyred wheels 200mm diameter fitted at the front with 125mm diameter swivelling castors at the rear for easy manoeuvring.
- ▶ Coated in a tough and attractive red epoxy-powder finish for long-lasting protection or available with a Hot-Dipped Galvanised finish for continual outdoor use.
