SATURN LADDER TOWERS

full specification for light industrial use

**MEDIUM DUTY
STEEL TOWERS**

The highly popular 4' x 4' base size shown here at 11' 6" platform height (17' 6" working height). Internal ladders and stabilisers, plus double-height guardrails and trapdoor platform set with toeboards are included to ensure compliance with the current regulations for scaffold tower safety.

SATURN LADDER TOWERS are a more robust range of steel towers with a smooth, weather resistant **PRE-GALVANISED** finish for long-lasting protection against corrosion.

An excellent choice for light industrial use, churches, schools and other applications **where compliance with current Health & Safety regulations for scaffold tower safety is essential but a budget price is also required.**

- ▶ Full 5 year UNCONDITIONAL guarantee.
- ▶ PRIME quality steel with weather resistant **PRE-GALVANISED** finish.
- ▶ 38mm / 1½" diameter tube x 16 gauge wall thickness in vertical tubes.
- ▶ All towers include adjustable castors, internal ladders, trapdoor platform, toeboards & stabilisers as required to comply with H&S regulations.
- ▶ Choice of tower base size options - 4'x4' (most popular) or 6'x4'.
- ▶ Erection instructions & detailed safety notes supplied with every tower.
- ▶ Safe working load 250kg evenly distributed.

6' x 4' towers give greater platform area and greater reach before having to move the tower, but platform levels can only be fitted at alternate lifts (5'6" intervals) so are not as versatile as the more popular 4' x 4' towers. (Now fitted with double height guardrails - not single height as shown.)

Adjustable Height Castors enable towers to be levelled on sloping or uneven ground outdoors.

Clip-on Ladders provide safe access to the trapdoor platform as required by the regulations.
