

Bespoke Container Access Platform

- » When ships containers are stacked 2-high, the issue of safe and useful access becomes a problem. Here is the solution!!
- » Hot-dipped galvanised finish for long-term outdoor durability.
- » Easy angled stair treads 200mm deep of punched steel with side handrails give full safety when carrying loads.
- » Wheels fitted for mobility.
- » Hand screw jacks for braking and levelling on uneven ground.
- » Platform height typically 2.75m
- » Platform plan size typically 2.5m wide x 2.0m deep of steel grating.
- » Large, guardrailed upper platform gives room for opening container doors plus space for loading/unloading.
- » Normally fabricated in subsections to fit in galvanising bath and supplied for final assembly on site.
- » Bespoke requirements quoted on request.
