

"TRADE" ALLOY LADDERS BS EN131 approved - Trade Duty

- ▶ "Trade" duty ladders have *stronger* stiles and rungs than domestic duty ladders and have *wider*, more comfortable rungs.
- ▶ Probably the finest quality "Trade" duty ladders in the UK - so our customers are constantly telling us!
- ▶ Tested and kitemarked to BS EN131 (previously BS2037 Class 2) max safe load 150kg (23.5stones).
- ▶ Very sturdy box-section stiles are much more rigid than the "I-beam" stiles of many other ladders.
- ▶ Extra large flat-top "D" rungs 40mm wide for greater comfort.
- ▶ Rungs are angled so feet rest on wide surface when ascending ladder (not on narrow rung edge as with square rung ladders).
- ▶ Full range of 3-section "Triple" ladders allows easier storage, easier transport, easier extension and maximum versatility.
- ▶ All three sections of triple ladders can be separated (unlike many brands) giving maximum versatility.

- ▶ Remember - these are the SUPERIOR "Trade" alloy ladders THE BEST because they have - 1/ stronger, less "bouncy" side stiles ; 2/ more comfortable rungs, set at the best angle ; 3/ a more robust, durable construction ; 4/ all 3 sections of "Triple" ladders can be separated (not possible on many other makes).

ELT340	3.91m / 12' 10"	10.44m / 34' 3"	3 x 15(14)	33.5kg

Note: Figures in brackets under "No. Rungs" gives current number of rungs e.g. "3 x 13(12)" means 3 sections each with 12 rungs. The "13" refers to the number of rungs this ladder used to have in each section before designs were changed when BS EN131 was introduced. Ladder lengths did not change, only the number of rungs. This will be important to remember when ordering replacements of old BS Class 2 ladders.
