

INDUSTRIAL ALLOY SHELF LADDERS

- ▶ Very robust alloy shelf ladders designed for regular use in industrial premises.
- ▶ Specifically designed for access to storage shelving units etc in warehouses, store rooms or libraries. Also suitable for occasional access to mezzanine floors.
- ▶ Fitted with a timber cross-rail at the top to rest against shelving or can be fitted with alloy shafting hooks to locate over a rail. Please specify which is required (included in price).
- ▶ Parallel side stiles 380mm (15") wide are fitted with ribbed non-slip alloy treads 80mm (3") deep. Heavy-Duty industrial models are 362mm (14") overall width and treads are 89mm (3½") deep.

* Working Height is vertical drop from your shelf to the floor - please measure this. Ladder will be longer.

PLEASE STATE AT TIME OF ORDER WHETHER **SHAFTING HOOKS** OR **TIMBER CROSS-RAIL** IS REQUIRED

All models can be fitted with side handrails at extra cost.

Other lengths and widths, plus many modifications can be made to your requirements as SPECIALS.

- ▶ Note: If ladders are to be stepped off, for access onto mezzanine floors etc, Health & Safety regulations require ladder to extend about 1.0m (3' 3") above the landing point to provide a secure handhold (unless an alternative rigid hand-hold is available - this can be provided on Shelf Ladder by fitting Top Loop Handrail to one side - state which side is required).
- ▶ These standard shelf ladders are just a part of our range - alternatives include sections of extension ladders with hooks at the top; rolling shelf ladders; wider bolt-in Access Ladders etc. Please enquire.

< CSXRAIL screws to a vertical surface for location of hooks.
