Simple & Safe!

Our Domestic / DIY Stairwell Scaffold kit offers safer access to a location which is always awkward to reach for decorating.

Stores away when dismantled in very little space but assembles on your staircase into a small scaffold 4'0" long x 2.0" wide (2' 5" wide including width of base plates).

Overall assembled height is 10ft at the lowest end, with the platform at 7' 6", giving reach heights up to about 13' 6". Platform can always be lowered by 2ft onto the rail below if more convenient.

Screw-Jack Adjustable Bases can be located at lower or upper end depending on which is best to create a level platform.

- ▶ This kit uses components from our standard Domestic Tower range to create a compact unit which will work in almost all domestic stairwells.
- ▶ Very compact when dismantled for storage.
- ▶ Quickly and easily assembled to provide a safe platform 4ft long x 2ft wide on your staircase.
- ▶ Frame width 2' 0" / 600mm and total width including base plates 2' 5" / 730mm maximum.
- ▶ No tools needed for assembly - it simply slots together in no time.
- ▶ Gives a reach height of about 13ft 6ins above the lowest stair tread and about 11ft above the upper stair tread.
- ▶ Can also be assembled on level ground to make a small tower.
- ▶ A sturdy steel scaffold with 32mm diameter vertical tubes x 16 gauge wall thickness and a high quality yellow finish.

Taller kits for very high stairwells are on our website.
