# EASY-RISE Steel Mobile Safety Stairs

**BSI kitemarked  
BSEN131-7  
max load 150kg**

- ▶ High quality and very sturdy Safety Stairs manufactured in the UK from heavy grade tubular steel.
- ▶ Extremely safe, stable and robust in use.
- ▶ Constructed from similar materials to our other models but with two important differences -
  - ▶ **an even shallower rake angle of just 48 degrees**
  - ▶ **a tread-to-tread height of just 230mm**

**These special features make ascent and descent even easier and safer - especially when carrying heavy objects.**

**Ideal where safety is paramount and space for manoeuvring is plentiful (increased overall base length)**

- ▶ Large treads of robust Punched Steel are 760mm wide x 200mm deep for security and comfort (anti-slip PVC covered treads are available as an option at same price).
- ▶ Large platform 400mm deep is surrounded by a 950mm high handrail on three sides. Toeplates fitted around platform on all models.
- ▶ Rubber tyred wheels 200mm diam fitted at the rear with 100mm swivelling castors at the front for easy manoeuvring. Roller bearings in all four.
- ▶ Braked by the side hand lever. When pushed back, the castors are automatically raised from the ground to stabilise the stair and rest on plastic floor pads. When pulled forwards the unit is fully mobile.
- ▶ Coated in a tough and attractive red epoxy-powder finish for long-lasting protection.
- ▶ Several optional extras are offered to enhance the standard range e.g. Anti-Slip PVC covered treads, Hinged Gates, Wire Baskets, etc.

Optional Hinged Gates can be fitted to end or either side & open inwards. Gates are spring loaded with plunger bolt closure.

Side gates increase platform length and overall length by 360mm.

EASY-RISE STEEL MOBILE SAFETY STAIRS						
CODE	No. Treads including platform	Platform Height	Tread Width mm / ft	Top Platform Size WxD	Overall Dimensions H x L x W (m)	Appx Weight
