Rolling Roof Walk Assembly

4.6m Rolling Roof Walk Assembly

With the addition of two trolleys and a guarded platform, parallel tracks of Board-Walks can be used to provide rolling access which is fully adjustable for pitch angle.

Position two parallel tracks of Board-Walk at maximum 4 metre centres. Install two trolleys, positioning the rollers on the stiles of the staging and engaging the hooks on a rung.

Lock the platform when level, lift the Catwalk onto the trolleys and secure using the ratchet straps.

Fit Posts into the Catwalk sockets, slide Handrails over them and add the toeboards.

The system can now be rolled up the Board-Walk track and positioned at the place of work. Both operatives must wear a safety harness and clip into the 3m Safety Line on one side of the Board-Walks.

Details and quotations on request.

Roof Board Walk

Safety for roof work and inspection is much easier to provide by using this excellent platform and handrail system.

- ▶ Roof Board Walk allows access from eaves to ridge level whilst spreading the load on support battens and provides the user with a safer working position.
- ▶ Lightweight aluminium construction suitable for fragile roofs.
- ▶ Easily portable in lightweight alloy components.
- ▶ Platforms in 4.0m & 2.0m lengths link together easily for longer runs.
- ▶ Mesh surface 60cm wide allows full visibility through.
- ▶ Simple assembly with optional Handrail System on one or two sides.
- ▶ Fully adjustable support Battens under platform can be positioned at any rung as required.
- ▶ Corrosion resistant for all weather use.
- ▶ Integral full length wire-rope work positioning line.
- ▶ Max safe load 150kg on each platform unit depending on roof type.
- ▶ Made-to-order and delivered FREE UK mainland in 7 - 14 days.

Roof Board Walk

BoardWalk units have alloy side stiles and rungs. Sizes are 2m or 4m long and 600mm wide with a steel mesh decking

4m BoardWalk

Joining Brackets with their long pin allow units to be linked in series for longer runs

Optional Extended Batten 1300mm — includes HandPost Socket (Standard Battens are 800mm wide & without socket)

On most industrial roofs neither Valley Stop Ends nor Ridge Hooks are needed to prevent BoardWalk sliding down pitch

Valley Stop End attaches to lowest BoardWalk unit and rests in valley to prevent movement

Ridge Hook can be fitted at top end to prevent movement but is only necessary on very steep pitches

Roof Valley Walk

- ▶ Instant, simple solution for safety in your roof valleys.
- ▶ Consists of a mobile safety cage for one or two persons specifically designed for light maintenance of valley-gutters such as inspection, cleaning or re-sealing.
- ▶ Lightweight aluminium construction, easily assembled & foldable.
- ▶ Can be 'parked' on suitable, windfree roof area.
- ▶ Adjustable for most roof angles including 'north lights'.
- ▶ Cushioned outriggers with safety mesh.
- ▶ Can also transport a light payload.
