- ▶ Original models were kitemarked to the old BS2037 Class 1 — the UK's strongest class — for the toughest jobs in the harshest environments.
- ▶ Now slightly modified and certified to the new **BS EN131 PROFESSIONAL** standard but are hugely stronger than this standard requires.
- ▶ When you need them really tough & really tall these are the beasts!! Max safe load 150kg (23.6stones).
- ▶ Super-strong side stiles give ample load support and rope operation takes the strain out of extension & lowering.
- ▶ D shaped flat-top ribbed rungs for comfort and safety.
- ▶ These Rope-Operated models have fully interlocking side stiles and swinging gravity latches. For extra ease of use and safety they are fitted with wall runner wheels at the top and wide stabiliser bar at the base.
- ▶ The largest rope-operated models are fitted with nylon rollers to decrease friction during extension, making this much easier and smoother than with other brands of ladder.
- ▶ Available in 2 and 3 section ladders which are kitemarked to BS EN131-2 Professional for Industrial Duty. Note that NHT355 and NHT360 sizes are "made to" the same standard but **not kitemarked**.
- ▶ Note also that these Rope-Operated ladders weighing over about 35kg are too heavy for use by one person alone and will normally require two people to carry and manoeuvre them.
