SATURN LADDER TOWERS

full specification for the discerning and demanding user

**MEDIUM DUTY
STEEL TOWERS**

The highly popular 4' x 4' base size shown here at 11' 6" platform height (17' 6" working height). Internal ladders and stabilisers, plus double-height guardrails and trapdoor platform set with toeboards are included to ensure the greatest safety, convenience and ease of erection. A fine tower choice for those who care!

SATURN LADDER TOWERS are a more robust range of steel towers with a smooth, weather resistant **PRE-GALVANISED** finish for long-lasting protection against corrosion.

An excellent choice for anyone needing the maximum in safety, convenience and durability from a steel tower system, without breaking the bank in the process!

- ▶ Full 5 year UNCONDITIONAL guarantee.
- ▶ PRIME quality steel with weather resistant *PRE-GALVANISED* finish.
- ▶ 38mm / 1½" diameter tube x 16 gauge wall thickness in vertical tubes.
- ▶ All towers include extra safety from ... adjustable castors, internal ladders, trapdoor platform, toeboards & stabilisers where required.
- ▶ Choice of tower base size options - 4' x 4' (most popular) or 6' x 4'.
- ▶ Erection instructions & detailed safety notes supplied with every tower.
- ▶ Safe working load 250kg evenly distributed.

6' x 4' towers give greater platform area and greater reach before having to move the tower, but platform levels can only be fitted at alternate lifts (5'6" intervals) so are not as versatile as the more popular 4' x 4' towers. (Now fitted with double height guardrails - not single height as shown.)

Adjustable Height Castors enable towers to be levelled on sloping or uneven ground outdoors.

Clip-on Ladders provide safe access to the trapdoor platform — much easier than climbing the frames
