

Solar Panel Ladder

To use, simply roll ladder up the roof on its soft rubber wheels and then flip 90° into position over the ridge. The special roof hook can be fixed to any rung, enabling the ladder to fit any size roof with the excess length flying the ridge.

Ladder can be traversed sideways along the ridge, with the use of special wheels fitted to the roof hook, in either direction (left or right) without it being taken down, allowing for much easier repositioning than with normal roof ladders.

Bridging ladder provides 23 cm clearance from the roof to the underside of the stile, allowing plenty of work space, and up to 4.6 m clear span over the roof and panels.
