

SpeediStair Temporary Alloy Staircase

- ▶ SpeediStair provides a rapidly fitted temporary staircase for safer access on construction sites than standard ladders.
- ▶ Gives easy and safe access between floor levels from the very earliest stages of construction.
- ▶ Simple and secure fixing method for installation in just minutes.
- ▶ Double height guardrails included for both sides for greater safety.
- ▶ SpeediStair fits a total vertical rise (floor-to-floor height) 2650mm to 3050mm.
- ▶ All alloy construction with non-slip treads 125mm deep.
- ▶ Staircase width excluding handrails 630mm. Overall width incl handrails 730mm.
- ▶ Rise per tread is 206mm, with a tread depth 125mm.
- ▶ Going depth 2437mm.
- ▶ Maximum safe working load 225kg uniformly distributed.
- ▶ Total weight 40kg but staircase alone just 24kg plus each handrail unit weighing 8kg.
- ▶ Does not comply with Building Regulations so is not suitable for permanent or public access.

No training required. Stair unit simply lifts into position and is secured with screws at top and bottom. Side handrails then drop into their sockets and thumbscrews are tightened to complete the installation. Can be completed by just one person in a matter of minutes. It could hardly be simpler!
