set-up-video:

ZAP assembly platform

- Swing-up steps with treads 200 mm deep for comfortable and safe ascent.
- Can be moved very quickly and comfortably, as it has four swivel castors on the access section and two fixed castors on the support section.
- Ready-for-use in no time through central brake on the access steps.
- Can pass through doors – even when erected.
- Large-area work platform, 1,800 × 600 mm.
- Tested to BGR 173 – total platform load 200 kg/m².

Flexible applications due to three different platform heights with just one work platform

Folding frame and pivotable steps mean space-saving transport and storage

Central brake locked by pedal operation

Central brake released by lifting the product

Comfortable access via 200 mm deep treads

Steps swing up into transport position
